Submitted to: Senate Environment and Health Committee

January 31, 2022

On behalf of Neighborhood Sun, a Silver Spring Maryland based community solar company, I ask for you to give SB 0308 a favorable report. We are a proud Montgomery County certified green business as we as a Maryland Benefit Corporation. Expanding the green business certification statewide will allow more businesses to get recognition for their positive environmental policies as well as provide more outreach and education to businesses looking to improve. It is an easy way for the state of Maryland to tout some of its innovative businesses. Our experience in the Montgomery County program has been very positive and I urge the committee to help expand this statewide by supporting SB 0308.

## About Neighborhood Sun

We are a Maryland based clean energy social enterprise with a mission to bring the promise of solar energy to everyone, not just the select few. From our headquarters in Silver Spring, we've helped expand community solar to all over Maryland, DC, New York, Colorado, and many other states. Our Sun Engine advanced software platform allows thousands of subscribers connect to community solar projects while giving the project owners unprecedented control over the administration of the projects.
